

How to Lock Your Bike?

There are a few simple steps to follow:

- ▶ Choose good quality locks, such as higher performing U locks from Kryptonite / ABUS / etc
- ▶ Lock bicycle frame and both wheels to secure stand, such as inverted U or Sheffield stand
- ▶ Preferably use two different types of lock, such as U lock and Chain lock
- ▶ Remove e-Bike battery and accessories
- ▶ Register your bike
- ▶ Insure your bike
- ▶ Consider using a GPS tracker

Using Multiple Locks

- ▶ Spend at least 10% of the cost of your bicycle on good quality locks
- ▶ Vary your routine and park in different secure locations

Locking your bicycle well, in a good location that is well lit and has good passive security, is essential whether you are parking short-term or long-term. See our brief guides on: [Bicycle Parking Short-term](#); and [Bicycle Parking Long-term](#).
